

This BOP Advisory is directed to the BOP approvers.

WF002 - Problems with Viewing BOP

CBS is aware of the problem that approvers are having with viewing the Budget Operating Plan (FM066) screen from the Document Requiring Approval (WF002) screen. Following is BOP Plan 75-2 (Trans 35915) which is waiting for approval.

NOTES	APVD	TYPE	DOCUMENT NUMBER	TRANS NO	FY	TOTAL (\$)	DATE REQUESTED	REQUESTED BY	
		OPER	75	0 2	35915	2006	-189,558.00	01-MAR-2006	K M DOWNS

When an approver double clicks on the highlighted line, the system should open up the BOP associated to that line, which is BOP Plan 75-2. The approver could then view the BOP 75-2 for accuracy. Since the new Software release that was promoted on February 25th, users are receiving the following message, instead of the BOP screen.

A request has been submitted to the Department identifying the problem so that actions can be taken to fix it.

In the meantime, you will need to review the BOPs by going through the Navigator to the FM066 screen and then back to the WF002 to approve the transaction.
